PROJECT FACT SHEET

**Delaware Bay Coastline, DE & NJ
Reeds Beach and Pierces Point, NJ**

September 2005

CONGRESSIONAL INFO: Sen. Corzine NJ, Sen. Lautenberg NJ, Rep. LoBiondo NJ-2

ACTIVITY: Construction General

TYPE: Ecosystem Restoration and Protection

PROJECT PHASE: Construction

AUTHORITY: The Reeds Beach and Pierces Point project was authorized for construction by Title I, Section 101 (b) (6) of WRDA 1999.

LOCATION: The project area is located within Middle Township, Cape May County along the Delaware Bay Coastline at Reeds Beach and Pierces Point, New Jersey.

PROJECT DESCRIPTION: The plan for the purpose of ecosystem restoration and protection at Reeds Beach and Pierces Point is an 80-foot wide berm at an elevation of +5.5 feet NAVD over a project length of 6,800 feet. The plan entails a one-time placement of sand for horseshoe crab and shorebird habitat. The estimated initial project cost is \$3.9 million.

PROJECT STATUS: A Limited Reevaluation Report (LRR) which updates costs and shows continued project viability is being prepared for submittal in September 2005 to HQ for approval.
